**Medina County Health Department Launches New Website
New Website Reflects Department's Unique Mission, Expertise, and Commitment to Health.**

MEDINA, OH—The Medina County Health Department announced today the launch of its new website, www.medinahealth.org, designed to educate Medina County residents about health department services. New website features include a calendar of events and website search by keyword. Website visitors can now sign up for email health alerts.

"We are excited to share this useful and engaging website with our residents. It includes all of the information provided on our last website with some upgrades and changes. Our goal is to make our information and services easy to find," said Dr. Raub, Health Commissioner.

The Medina County Health Department's newly designed website, www.medinahealth.org, will provide emergency health information, details on available health services, and reliable health resources to county residents. This site, along with Facebook, Twitter, and other print and online outreach, will serve as tools for the department to update residents on important health issues. Additional site updates are in process, so check the site often for the latest news in public health.

About Medina County Health Department

The Medina County Health Department's mission is to prevent disease, assure a healthful environment, prolong life, and promote well being for the citizens of Medina County. For more information about the Medina County Health Department, call 330-723-9688, toll-free at 1-888-723-9688, or visit www.medinahealth.org. Services are partially funded by your local property tax health levy.
